PROFESSIONAL SUMMARY

Dr Andrew Morgan is a HCPC-registered Clinical Psychologist with over 15 years of experience working with adults experiencing mental health difficulties, particularly within the field of clinical health psychology. He received a First-Class degree in Psychology from Liverpool Hope University in 2010, before completing his Doctorate in Clinical Psychology at Lancaster University in 2018, writing his doctoral thesis on clinical health psychology.

Dr Morgan has extensive experience across a range of clinical health psychology specialisms, including cancer, haematology, cardiology and respiratory conditions. He has worked in both clinical and academic positions and is currently the lead psychologist for the Clinical Haematology Service at the University Hospitals of Liverpool Group. He lectures on the Clinical Psychology Doctorate at the University of Liverpool and is actively involved in academic research and delivering presentations and training on the topic of clinical health psychology.

Dr Morgan has been working in private practice and preparing independent expert psychology reports since 2018. He specialises in complex and high-value personal injury and clinical negligence cases, including cases involving multifactorial psychological causation. He is an EMDR Consultant and trauma specialist with particular expertise in post-traumatic stress disorder, psychological trauma and psychological injury arising from serious physical illness, medical treatment and adverse medical events.

Dr Morgan offers assessments remotely and face-to-face in Liverpool and is willing to travel where required.

Dr Morgan's Claimant/Defendant Ratio is 60:40. He accepts instructions for Clinical Negligence and Personal Injury cases.
